

Environmental and Permitting

Chapman's environmental attorneys have significant experience in coordinating and managing all aspects of environmental and permitting activities related to renewable energy projects, including in connection with projects where the Endangered Species Act is implicated.

Our full range of legal services related to environmental and permitting includes:

- Cultural, Archeological and Historical Sites
- Aviation Approvals
- Conservation Land
- Due Diligence
- Environmental Assessments
- Occupational Health and Safety
- National Environmental Policy Act
- Siting Approvals
- Soil and Groundwater Assessments
- Spill Prevention and Control
- Storm Water Permitting
- Telecommunications and Information
- Wetland Regulations
- Avian, Wildlife and Endangered or Threatened Species (including the American Burying Beetle, the Lesser Prairie Chicken, the Desert Tortoise, the Indiana Bat, Whooping Cranes and Bald and Golden Eagles)
