

Renewable Energy

Chapman and Cutler's Renewable Energy practice provides a wide spectrum of legal services to investors, lenders, developers, owners, contractors, equipment suppliers and utilities in the renewable energy sector. The practice is comprised of an interdisciplinary team of lawyers with extensive experience in the areas of energy, finance, real estate, construction, energy regulation, environmental, tax, corporate, and other relevant areas of the law. We tailor our deal teams to complement each particular transaction, thereby increasing our ability to assist clients in developing effective and efficient transaction structures.

Our experience in renewable energy project assets includes:

- Wind
- Solar
- Hydro
- Biomass/Landfills
- Ethanol Production Facilities
- Geothermal
