Chapman Named Green Power Partner

Recognition

July 28, 2016

For the sixth year in a row, Chapman received special recognition from the U.S. Environmental Protection Agency as a Green Power Partner. Chapman is considered a 100% Green Power Purchaser because of the investments we make in renewable energy certificates (REC's) through NextEra Energy. These RECs offset the environmental impact associated with the conventional electricity generated in our offices. Chapman's Practice Green initiatives are committed to environmental sustainability and champions everyday environmental efforts, including lighting and energy conservation, recycling, water use reduction, and green purchasing.
